

YONAS GIRMA

Software Engineer · IT Professional

About Me

Results-driven IT Professional and Software Developer with hands-on experience building mobile, web, and desktop applications. Skilled in the JavaScript/TypeScript ecosystem (React, Node.js, React Native) and comfortable operating in Linux-first environments. Passionate about integrating AI capabilities into practical products, optimizing system performance, and delivering elegant, scalable solutions.

Experience

Software Developer

Self-Employed / Freelance Projects 2023 - Present

- Designed and built cross-platform mobile applications using React Native & Expo
- Developed full-stack web platforms with React front-ends and Node.js/Express back-ends
- Integrated third-party APIs (Firebase, Telegram Bot API) and AI services into live applications
- Set up CI/CD pipelines, containerized services with Docker, and managed Linux servers
- Practiced clean-code principles, component-driven architecture, and RESTful API design

IT Support & Systems Specialist

- Diagnosed and resolved hardware, software, and network issues across enterprise environments
- Maintained system configurations, user accounts, and software deployments at scale
- Improved team efficiency through documentation and automation of repetitive tasks
- Provided on-site and remote technical support to end users

Education

Haramaya University

2022 - 2027

Bachelors Of Information Technology
